Product Information

2-WAY loudspeaker system provides high output, low distortion sound reinforcement. TREX is arrayable loudspeaker designed for a wide variety of medium to long-throw applications. The TREX tightly defined coverage pattern allows seamless integration into array clusters which may be tight-packed for long throw or splayed for broader coverage. This system is designed for a wide range of professional applications. High performance and very high peak output for concert sound. The TREX powering mode is only Bi-Amp operation with external digital processor.
